## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1 and 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Dent (U.S. Patent No. 5,745,856).

Regarding claims 1 and 11-13, Dent teaches a method and software radio receiving unit for processing the radio plurality of radio communication standards band of frequencies, characterized in that it comprises the following steps or means:

Art Unit: 2642

a wide band analysis step for acquiring information concerning the radio signals contained in said wide band of frequencies and selecting a suitable narrow band processing for demodulating said radio signals (column 4, lines 39-49), and

a step for the narrow band processing of said radio signals contained in said wide band of frequencies so as to demodulate them (column 4, lines 50-67).

***Allowable Subject Matter***

3. Claims 2-10 and 14-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Schroeder (U.S. Patent No. 4,352,208) teaches an automatic IF selectively for radio receiver system. Dent (U.S. Patent No. 5,668,837) teaches a dual-mode radio receiver for receiving narrowband and wideband signals.
